JURA IMPRESSA Xs9 Classic Aroma⁺

SWISS  MADE

Exciting drinks at the touch of a button

Mention the word 'coffee' today and people no longer think of just espresso or milk coffee but also popular favourites like latte macchiato or cappuccino. A trend that now extends itself to boutiques, offices and the catering sector. So the fact the IMPRESSA XS9 One Touch produces no fewer than twelve different coffee types – including latte macchiato – at the touch of a button is welcome news. And thanks to its compact dimensions and lightweight (13.8 kg), the machine delivers the mobility we associate with JURA.

Design

From the start it was clear that the design of the machine would have to reflect the quality and characteristics of our freshly prepared coffee specialities. Controls such as the selector with backlit pictogram, the Rotary Switch or the graphics display are not only eye-catching optical highlights but also an immense aid to navigation from the word 'go', not mention to the illuminating light for your coffee preparation.

Ecological Intelligence

The IMPRESSA XS9 One Touch helps relieve the strain on the environment and your budget. Thanks to Energy Save Mode (E.S.M.©) the machine uses up to 40% less energy and, if you so wish, switches automatically to standby mode after a certain time. JURA is therefore already complying with the strict statutory values.

One-Touch Technology

For most of us, enjoying a well-made cup of coffee is one of life's daily pleasures. With the unique One-Touch technology by JURA even speciality coffees with milk are no longer time-consuming. The IMPRESSA XS9 One Touch delivers cappuccino or latte macchiato at the touch of a button, with no need to move the cup.

An all-round coffee solution

Using optional modules such as the Cup Warmer, with a matching milk cooler or an accounting interface, the machine can be upgraded into an all-round coffee solution or optimized for self-service areas. Even people with little or no experience of coffee machines will find it a snap to operate because the controls are intuitive and easy to understand. The programming buttons are concealed discreetly behind a flap. And if circumstances require, these can even be blocked to only be accessible to specific users.

With optional extended bean hopper 750g
